

Product Manual

A. Product Parameters:

Rated voltage: AC100~240V 50/60Hz

Power: 2W

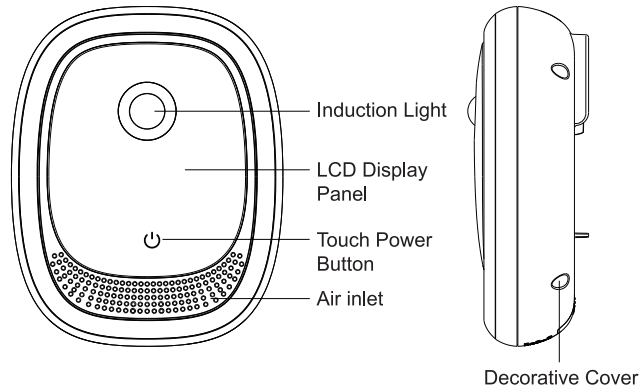

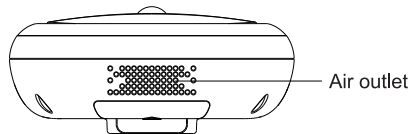

Negative ion concentration $\geq 7.0 \times 10^6$ / 7 million ions

Noise: 10dB

Product size: 4.72(L)*3.78(W)*1.68(H) inches

Recommended use area: Max 320 ft²

Product parts description:

B. Working Principle:

Air Purifier Function: The product has a built-in negative ion generator, which generates negative ions during operation. The negative ions have adsorption and break-down properties. Negative ions can precipitate dust in the air, remove second-hand smoke, oil fume, fine dust, pollen, and other floating objects. Negative ions also reduce PM2.5 harmful substances and freshen the air.

Negative Ion Generator: The product uses a built-in negative ion generator to purify the air. Compared with traditional filter air purifiers, this new product adopts an in-line type, without the need to replace any filters, saving time and cost.

Two-Color Night Light: Built in sensor with two color options: cool white and warm white.

C. Working Mode:

1. When the product powers on, it directly enters the C1 mode, and the LCD display panel displays C1. Short press the power button to enter the C2 mode, and short press the power button again to shut down. The fan and negative ions are stopped in the off state. The night light function works normally.
2. C1 mode: It is the working state of negative ions, the negative ions work for 5 hours, the standby time is 1 hour. The night light color is cool white.
3. C2 mode: It is the working state of negative ions, the negative ions work for 5 hours, the standby time is 1 hour. The night light color is warm white.

D. Night Light Function:

The night light function has a built-in sensor which can sense the human body up to 10 feet away. When movement is detected, the light will remain on for 30 seconds before shutting off.

E. Clock Display Function:

When powered on use the + and – buttons to select desired time. Unit must be in either C1 or C2 to modify the time.

F. Precautions Or Use:

1. The fuselage cannot be drenched in water during use, please use it in a dry environment.
2. If the space you use is relatively large, it is recommended that you purchase more than one to use at the same time, the effect will be better.
3. If you use the purifier function for a long time, please use a dry cloth to clean the air inlet and outlet regularly once a week. To prevent the air inlet and outlet from being blocked.

4. If the surface of the machine is slightly hot during continuous use, which is a normal phenomenon, you can choose to turn off the machine for 30 minutes and then turn it on again, which can provide a high product life.
5. Suitable scene: suitable for kitchen, bathroom, pet kennel, wardrobe, bedroom, living room, basement, garage, hotel, hotel, office and other places.
6. After the power is off, the clock display does not have a memory function, and the time function should be reset.
7. Do not fold and remove the decorative cover without permission.

G. Cleaning And Maintenance:

1. If there is dirt on the outer casing of the machine, please wipe it with a dry soft cloth.
2. Regularly clean the air inlet and outlet of the machine once a week, do not let dust block the air outlet, wait 3 to 5 minutes to clean the product after powering off.
3. When the product will not be used for a long time, please remove the product from the socket.
